

1

"Like hitting the lottery!" - CNBC Pundit

Skim \$5,250 Per
Month Using My
Secret Banking
"Pass Code"

Starting tomorrow at 12 noon E.S.T., YOU can divert EXTRA MONEY into your bank account each month - legally - from the world's computerized marketplace!

2

Dear Friend,

This is very urgent, so I'll get right to the point...

3 Starting tomorrow just after 12 noon EST, you could begin skimming \$5,250 per month from Wall Street's banking coffers. If you want, you'll be able to transfer this money straight into your personal bank account... *free and clear*.

Even better, you can do the same thing every month from now on.

From my experience, this computerized stream of cash could pay for a new car after just six months... After a couple years, you could begin an early retirement, as I've done.

If this all sounds too good to be true, I understand. I wouldn't have believed it myself had I not learned about this practice firsthand, over the course of four long years.

Indeed, you're about to discover how this operation is already making some people very rich. More than 109 leading bankers are involved. And dozens of their CEO friends, too.

4 At the touch of a button, these power players are skimming millions, even billions of dollars. Where is it going? Personal bank accounts in London, Geneva, Grand Cayman, San Francisco, Sydney and New York City.

And for reasons that will become clear, I think it's high time you began collecting your share of the proceeds.

Follow the instructions in this letter, and you'll have the chance to "skim" at least \$5,250 per month from this operation. You can wire this extra money right into your personal bank account. And you can start tomorrow at 12 noon.

5 This may sound like an unusual opportunity. But it's very important that you act fast. I expect the next transaction to hit very soon. And this one could easily be worth \$26.5 billion or more. (That's a lot of free money, no?)

I'll show you how to "skim" a small percentage from this transaction using your home computer. You could clear several thousand dollars. Even better: By using this same technique each month, you could grow consistently richer. All you need is a little patience.

But before we get to the details, let me tell you how I discovered its inner workings... You'll see just how it's been making a small circle of my friends rich... and how it can do the same for you starting just hours from now...

Like most investors, I knew the big investment banks were powerful... But until I went to work for them at Wall Street's 2nd biggest bank, I had no idea how much FREE MONEY was changing hands...

My whole life, I suspected that the biggest players on Wall Street weren't playing fair. No matter how poorly the markets were doing, they never had to give up their BMWs... They just seemed to get richer... But I wasn't sure how that could even be possible!

I mean, just think about the real estate crunch we're in right now.

Do you really think the investment bankers in Manhattan are worried about losing THEIR houses - I mean mansions in the Hamptons? Do you think their "adjustable rate mortgages" keep them up at night?

Not on your life.

Instead, the Wall Street elite have found a way to get richer every day... one secretive transaction at a time. Even as I write, their bank accounts are slowly growing thanks to a banking "operation" spanning the globe and worth \$2.8 trillion per year.

I discovered how this operation works from the inside - as a senior analyst for the second-biggest bank on Wall Street.

And now I'm going to show you exactly how to collect your share, legally. But why would I reveal this information to you? Why not just keep all the free money to myself?

6 Actually, the answer comes down to principle...

For an "Average Joe" from NJ, it was a LOOONG trip across the Hudson... But what I found when I got there was worth the wait... The "Pass Code" to their secret operation worth \$2.8 trillion dollars...

Unlike most of the "superstars" of Wall Street, I wasn't born with a silver spoon in my mouth. Instead, I grew up in a humble New Jersey town. We lived just across the Hudson River from New York's glitz and glamour.

Going back generations, we're firefighters. Union guys. School teachers. I played linebacker on my high school team and loved it. I even dreamed on becoming a firefighter myself.

But somewhere along the way, the Manhattan skyline seduced me.

So I worked my way through a fancy Eastern college. Shortly after, the second most powerful investment bank on Wall Street recruited me. This was a "bulge-bracket" bank with more than \$449 billion in assets under management. I would be reporting directly to one of the bank's legendary minds. What luck!

My 70-hour workweeks and ability to perform under pressure got me promoted to senior analyst. And that's when I came into the possession of the computer "Pass Code" known only to the bank's Elite.

With this "Pass Code" I could "peek inside" the computerized banking system and see exactly where the money was moving.

And that's how I discovered the inner workings of a worldwide moneymaking "operation" involving dozens of investment bankers and CEOs... more than 600 discreet transactions per week... and the transfer of more than \$2.8 trillion per year into various accounts.

If they were skimming \$323,991 from a \$2 billion transaction into account A42X443 on Monday morning, it would appear on my screen... Same thing if they were diverting \$748,488 from domestic account 8988-003USSWS into offshore account 422455T3CAY between 9:41 a.m. and 9:42 a.m.

One afternoon I saw one of these transactions, worth \$1.6 billion, flash across the wire. And I estimate that about \$8 million was "skimmed" right off the top and into the accounts of this operation's insiders.

And while their operation was confidential, it was *perfectly legal*.

As an expert on the inside, I was living the "dream." But something was wrong: The "Average Joes" back in the old neighborhood missing out entirely!

So one afternoon I decided to give it a try myself... Using my ""Pass Code", I peered into the computerized banking system. After identifying a fairly large transaction, I took my "skim." It was "only" a few thousand dollars. But...

My heart was suddenly beating out of my chest.

I realized that anyone could tap into the sheer power of these huge transactions if they knew how to... Over time, my friends and family could get ridiculously rich... And they could do it while beating the Elite at their own game - bonus! About a week later I handed in my resignation...

7 But I took what I had learned with me. Industry knowledge that the average investor couldn't hope to gain access to on his own - my own "Pass Code" was born. Since then I've been perfecting my technique for using it on the biggest banking transactions on the planet.

So far the system has allowed one of my associates to pocket \$9,000 from a \$9.29 billion transaction... Another was able to collect \$5,250 from a \$3.3 billion transaction... But get this: another associate was able to "skim" \$61,150 from a recent transaction worth \$1.65 billion...

Instead of worrying about the stock markets, we've found a way to book gains no matter what. We don't lose sleep over the economy. And as for what Ben Bernanke's going to do next? Or China? Or the S&P 500? Or oil prices? WHO CARES!

When you can potentially make money off every single banking transaction that crosses a computer screen in New York, you don't worry about these things any more. But you might have to think about where you're going to put all that extra money. (Of course, that's up to you!)

But how will YOU soon be able to "skim" \$5,250 each month using my "Pass Code" technique? To understand how it's going to work, you first need to realize something...

All you need is an Internet connection... an e-mail address... and my "Pass Code" known only to the investment banking "Elite" ...
until now...

The transactions I'm talking about aren't grandmas moving a few hundred from savings into checking. We're going after big game. I'm talking about the biggest money transfers in the financial industry. They can involve the transfer of millions or even billions of dollars in a single moment.

Warren Buffett calls these transactions the "elephants." And they typically result from Wall Street deals like takeovers... leveraged buyouts (LBOs)... and mergers and acquisitions (M&A)...

Call them what you will, these kinds of transactions are a daily thing on Wall Street. No matter what's happening in the markets, the financial world is constantly humming with deals.

What most people don't realize is how RICH the bankers are getting just by taking their "skim" from the transactions themselves.

8 During one six-month period recently:

- Goldman Sachs advised on 237 takeover transactions worth \$833 billion... That allowed the bankers to "skim" approximately \$4.1 billion.
- My Former Bank, the second most active behind Goldman, advised on 229 deals worth \$798 billion. Some \$3.9 billion went to the bankers...
- Citigroup advised on 269 deals worth \$748 billion... About \$3.74 billion was siphoned off into the bankers' accounts...

Over that same period, the big banks announced more than \$2.88 trillion in deals. That's 38% more than the record set during the first six months of 2006.

If you're like most people, you only hear about the high-profile takeovers. The deals involving Harrah's, Hertz and the Four Seasons, for example. Yet each week there are about 682 takeover-related transactions taking place that most people NEVER hear about.

And therein lies the key to YOU "skimming" \$5,250 from this constant stream of transactions every month using my "Pass Code" technique...

"Hitting a takeover target is like hitting the lottery..."
~ Jim Cramer

You see: Every takeover, merger or acquisition must go through an investment bank...

Since these banks conduct all their business electronically... we can use my "Pass Code" technique to "peek inside" their computers. That lets us "see" which companies are about to be taken over next - without ever being detected ourselves!

9 So how do we "skim" our share from the coming transaction LEGALLY? That's the beauty to this system. You see, if you know which companies are being taken over in advance, you can quietly add

the shares to your portfolio. And then you sit back and watch them double, triple, even quadruple in price, sometimes mere hours after adding them to your portfolio.

That's why former Goldman Sachs honcho, hedge fund wizard and current *Mad Money* host Jim Cramer says: "*Hitting a takeover target is like winning the lottery.*"

And why *Science Daily* reports, "*Stock prices of firms almost always go up immediately after an announcement of a takeover bid by another company.*"

The reason is simple. When one company wants to buy another, the buyer must pay a "premium" to secure all outstanding shares. Since it's usually 75% or MORE above the current share price, that premium becomes your initial "skim."

But it gets better. Say you buy the shares one month before the announcement. But a week after adding them to your portfolio, news of the coming deal leaks out... That's when speculators can send your position soaring 300%... 800%... even 1,223%... Sometimes in mere days.

Using my computer "Pass Code" technique, you can pocket these kinds of gains month after month. I've incorporated it into an amazingly powerful stock advisory letter called the *Takeover Trader*.

Starting tomorrow, just after 12 noon, this system could hand you \$5,250 per month... every month from now on. But based on our track record, that's being conservative... Take a look...

10

SECRET MONEY TRANSFER #1 **Skimming \$5,250 from the Hyperion Deal**

Target Company: Hyperion Solutions
Overall Transaction Value: \$3.3 billion
Percent Gain: 105%

Not long ago, the system locked onto a little-known technology firm called Hyperion Solutions. The company was hitting on all cylinders. Its price was reasonable. It was gushing cash... Just ripe for the picking!

Using my computer "Pass Code" technique, I "took a peek inside" the investment banking computers. Within 30 seconds, I confirmed my system's initial read... *Indeed, the money was already changing hands ahead of the coming transaction.*

Moments later, my readers received a short e-mail alert. It said:

Hyperion is attracting enormous amounts of interest. Let's get positioned before the activity hits.

The mainstream media was surprised when news of the deal finally hit: Oracle was buying Hyperion for \$3.3 billion!

But my readers were quietly able to buy the stock ahead of the announcement. That handed them 105% in potential gains. (That's what instant demand for all outstanding shares can do for a stock's price.) A single \$5,000 investment would have netted \$5,250 in potential gains!

But that's nothing compared to some of the bigger "skims" we've taken recently...

SECRET MONEY TRANSFER #2 **Skimming \$9,000 from the Compass Bancshares Deal**

Target Company: Compass Bancshares
Overall Transaction Value: \$9.29 billion
Percent Gain: 180%

Not long ago, the *Takeover Trader* identified Compass Bancshares as a "hot target." So I used my "Pass Code" to confirm the coming deal via the banking system computers.

Sure enough, it showed that a \$9.29 billion transaction was imminent.

Moments later, I rushed an e-mail alert to my readers. It told them exactly what to do and when. Had you acted on that alert, you could have pocketed \$9,000 in pure cash for every \$5,000 invested. (That's a nice 180% gain.) You could have walked away with \$14,000.

And with this system, you never do anything more complicated than buying stocks! I recommend exactly what stocks to buy and when. It's that simple.

Our 33 "Transaction Triggers" Revealed

My proprietary *Takeover Trader* system identifies companies before they are taken over, so you can invest before the "official announcement" sends the stock soaring.

The system is based on the following 33 metrics - my Transaction Triggers:

1. Electronic "Pass Code" reading
2. Price to cash (& cash equivalent) ratio
3. Price to working capital ratio

But even though it's simple for you to use, the *Takeover Trader* is sophisticated... Let me tell you more about how it works... and how it could soon hand you an extra \$5,250 each and every month...

11

Not just a single powerful indicator... a proven 33-point system designed to let you sleep well at night

First, my "Pass Code" gives us an "unfair advantage." Just like the bank insiders themselves, we can "see" when takeovers are coming. And that gives us an advantage almost no one outside of the Wall Street machine enjoys.

But trading on any one indicator - no matter how powerful - is a sucker's game.

So I've incorporated the "Pass Code" technique into a professional simple system that identifies and cross-checks every recommendation using 33 proprietary metrics.

I call them the *Transaction Triggers*. And in various combinations, these indicators have combined to predict every major takeover going back to 1987.

Not only that, they're designed to cut your risk down to the bone... providing steady gains along the way. (Meanwhile, the takeovers boost gains exponentially with one moon shot after another!)

But you don't have to concern yourself too much with the technical metrics behind the system. I do the work for you.

Instead, you just sit back and wait for my clear, concise e-mail alerts to arrive each week. When a deal looks good, you'll know exactly how and when to make your move...

But how much money can you make from these opportunities? Let me show you another example...

4. Cash flow over peers
5. Liquidity trend score
6. Earnings-per-share growth 1 year
7. Product viability/pipeline
8. Market capitalization - hot zone
9. Organizational resources
10. Private equity target score - institutional
11. Hedge fund target score
12. Stage 1 confirm - secondary source
13. Stage 1 confirm - primary source
14. Stage 2 confirm - secondary source
15. Stage 2 confirm - primary source
16. Stated target sector ranking
17. Implied target sector ranking
18. Management vulnerability
19. Shareholder activism
20. Price trend - 6 months
21. Price trend - 1 year
22. Price to earnings ratio
23. Price to sales ratio
24. Hot confirm - primary source
25. Offer status - pre-announcement
26. Offer status - post-announcement
27. Non-public, institutional confirm
28. Strategic volume spiking
29. Front Run metrics
30. Form 8K clause
31. Deal breaker 1: poor sector perform
32. Deal breaker 2: downtrend in cash flow, product pipeline
33. Deal breaker 3: "spilled" knowledge

SECRET MONEY TRANSFER #3

Skimming \$6,650 from the Hollis-Eden Deal

Target Company: Hollis-Eden
 Overall Deal Value: \$54 million
 Percent Gain: 133%

Not long ago, the *Transaction Triggers* were lighting up like a Christmas tree. The target: an obscure drug company called Hollis-Eden. It was registering especially high on #5, #12, #13 and #27.

In addition, the company was producing a vaccine that the government needed desperately (*Trigger #7*)... Plus, its small size made Hollis the perfect takeover target for a big, aggressive firm (#8).

So we took a peek inside the banking system computers using my electronic "Pass Code" technique. Seconds later, we had confirmation of a likely deal.

I immediately sent an alert out to *Takeover Trader* subscribers. As you can see from the chart above, the stock shot straight up after our recommendation.

It was enough to turn every \$5,000 invested into \$11,550. Yes, you would have CLEARED \$6,550 from this deal alone. But that was nothing compared to what we were able to "skim" when speculators piled into shares of OptionsXpress ahead of a rumored takeover deal...

SECRET MONEY TRANSFER #4

Skimming \$61,150 from the OptionsXpress Deal

Target Company: OptionsXpress
Overall Deal Value: \$1.65 Billion
Percentage Gain: 1,223%

When our system identified OptionsXpress as a takeover target, it was an obscure online trading company. If you weren't an options-trading geek, you probably didn't know much about it.

Nevertheless, OptionsXpress registered high on 29 of the *Transaction Triggers*. The alarm sounded. We took an online peek into Wall Street using the computer "Pass Code" technique. Sure enough, we could see that the wheels were already in motion on the upcoming deal.

I alerted readers right away. And over the next few weeks, the speculators - trying to front run the deal we'd already confirmed - drove our position up 1,223%!

In other words, this opportunity allowed each of my readers to "skim" \$61,150 for every \$5,000 invested. More than enough to pay for one of those fancy BMWs you see patrolling Wall Street all the time.

12 But while these massive winners are tremendous, what's important to keep in mind is this: The *Takeover Trader* system works on any investment banking transaction, big or small. And that means we NEVER run out of opportunities to take fast, steady gains...

How to "skim" \$96,466... \$289,399... or even \$482,322... over the next 12 months...

To understand how the gains can really add up, consider this...

Last year, the *Takeover Trader* produced 1,829.33% in net gains. That includes both winners and losers. Meanwhile, the investing "herd" made 10.7% investing in the S&P 500.

Had you invested in every recommendation, you could have turned \$5,000 into \$96,466... \$15,000 would have mushroomed into \$289,399... And \$25,000 would turned into a whopping \$482,322. After just one year!

But as you're about to see, I expect the coming 12 months to be even more profitable. You could easily "skim" \$5,250 or more from these massive banking transactions every month. And all you need to do is join us now... before the next opportunity hits...

What would you do with
an "extra" \$63,000 right now?

By subscribing to the *Takeover Trader*, you'll receive the identities of dozens of takeover target companies - well before the transactions hit. So you can be sure of capturing maximum gains.

13 On average, you'll get 2 to 4 fresh recommendations per month. Each with the potential to hand you \$5,250 gains... or much more (remember the OptionsXpress play?).

Taking your "skim" from just 12 of these opportunities could

We Skimmed Our Share
of the \$4.8 Billion Sony
Deal... and Dozens of
Others, Too... Here's the

hand you an extra "side income" of \$63,000 this year.

That's certainly enough to pad your retirement account nicely... Like I said, I retired from the office well before my 40th birthday thanks largely to the *Takeover Trader* system.

Fact is: I've made a LOT more money using this system than I ever made at that plum Wall Street job!

When you can identify coming takeovers in advance, it's kinda hard NOT to get rich... if you're patient enough...

Continuous opportunities to skim \$10,000... \$16,600... \$19,800... from deals worth billions...

So far, I've only given you some highlights when it comes to how much money the *Takeover Trader* system is generating these days... A few more recent examples...

- 200% in Just 2 Months on the Western Gas Deal: We were able to book 200% gains in an exploration company called Western Gas Resources in just two months... It was enough to turn every \$5,000 invested into \$15,000... with \$10,000 cleared...
- 332% in Just 7 Weeks on the Netflix Deal: After the system began clicking on 24 Transaction Triggers, I recommended online video store Netflix, and the stock popped 332%... turning \$5,000 invested into \$21,600... and clearing \$16,600...
- 396% in Just 3 Months on the Murphy Deal: My subscribers were able to pocket 396% gains in about three months on energy mid-cap Murphy Oil... enough to turn \$5,000 into a very respectable \$24,800... clearing \$19,800...

But how can these stocks be so profitable even when the markets are in turmoil, as they have been for months now? Here's the answer:

We're not buying and hoping. Instead, we're buying ahead of banking transactions. No matter what, the big wheels of the Wall Street machine will keep spinning. And we can book gains even if the S&P 500... the Dow... gold... real estate... bonds... and the dollar ALL come crashing down... (Trust me, the investment bankers sure will.)

Let me show you a few more examples of how much money you can make with this system...

Proof...

How many deals can you expect to profit from using the *Takeover Trader* system? Over the next 12 months, you'll get in on 30-50 opportunities like these...

The system indicated that Metro-Goldwyn Meyer was about to be taken over... Weeks later, Kirk Kerkorian sold the movie giant to Sony in a deal worth \$4.8 billion... We took our skim!

When I informed readers that Cincinnati Bell was about to be sold to the highest bidder... I was surprised that the deal went down quicker than expected! We took our skim!

The list of targets we've confirmed using the *Takeover Trader* system is massive. Here's a partial list of some recent example (*all "Pass Code" confirmed ahead of time!*):

- Advanced Neuromodulation
- Exult Incorporated
- Aventis
- Panamsat
- Tommy Hilfiger
- Seibel Systems
- Metris
- Sipex Corp
- Commonwealth Telephone Enterprises
- Internet Security Systems
- LaQuinta
- MBNA Corp
- Unocal
- Western Gas Resources
- Compass Bancshares
- Red Hat

Tomorrow at 12 noon EST, you can begin "skimming" your share from deals just like these. Please read on for details...

By seeing their moves ahead of time, you can book gains of 183.3% ... 320% ... 396% and more... *fast*

We knew that King Pharmaceuticals had a talented in-house sales force. We also knew its branded-drugs program was presenting a huge moneymaking opportunity for generic drug makers. (*Transaction Triggers #7, #9.*)

With my "Pass Code" technique, I tapped into Wall Street and saw money changing hands ahead of a possible takeover.

Soon enough, takeover rumors swirled at the big banks in Manhattan. And we cashed out with a swift 183.3% gain...

When West Corporation announced it was scooping up Intrado, Inc. (*Triggers #1, #2, #8*) for \$26 a share, we made 56% in six months (*#20*)... Before that, we booked 50% and 320% gains by playing the options on Intrado!

After profiting with positions in Western Gas Resources and Unocal (*Triggers #16, #17*), we locked in gains of 185.19% on a little-known oil company that fell into the crosshairs of a buyout firm.

With the *Takeover Trader* technique, our goal is to profit through all markets. And we can do it because the Wall Street deal machine never stops!

But you might have noticed something else. Our 33 *Triggers* ensure that we ONLY add quality, undervalued companies to the portfolio. Ironically, this system is both wildly profitable... and surprisingly safe.

Score triple digits... even on the "losers"?

For example, the system showed a consolidation pattern forming in the online employment sector. Monster Worldwide was tripping new *Transaction Triggers* almost every day, for three weeks running...

Using my computer "Pass Code" technique, I confirmed the upcoming transaction. We added Monster to the portfolio.

A few days later, the rest of the "Street" caught on. Trading volume spiked to more than double the daily average. Monster shares soared. Within weeks, *Takeover Trader* produced a quick 150% gain on the position!

But get this: The deal fell through!

How? Because the strict metrics we use (the *Triggers*) ensured that Monster was a good value regardless of the takeover potential. So when the rumor hit that the company would soon be taken over, the shares soared based on rumor... and the willingness of huge speculators to pile into this quality company!

The "smaller" gains really add up, too...

14 Indeed, every time a new rumor sweeps down the corridors of Wall Street, we are able to pocket fast gains... Some examples...

- Rumors send Celgene rocketing 74% higher the minute we added them to the portfolio. A \$5,000 investment could have handed you a quick \$3,700.

- Rumors drove Tom Online up 44%, handing us an opportunity to skim \$2,200... starting with that same \$5,000.
- Internet Security Systems rose more than 55% after speculation that Cisco Systems, among other suitors, had the company in its sights... \$5,000 here would have turned into \$7,750 very quickly.
- Shares of Atherogenics soared 64% in a single day... handing subscribers with \$5,000 invested a quick skim of \$3,200. The stock jumped 104% (from \$16.11 to \$33) in less than three months!

Now, starting tomorrow at 12 noon EST, you can begin booking gains like these. And you can do it every month! Even if the markets are tanking, going sideways, or soaring...

15

We've found a way to sidestep volatility... by pocketing steady gains from these "boring" bank transactions...

Wall Street banks maneuver "behind the scenes" 24/7. And no matter how bad the credit crunch gets here in the U.S., there will always be enough activity to keep the large deals flowing.

For example...

This morning, the markets are zigzagging again because of energy prices, earnings and volatility warnings from the Fed... Yet my sources indicate that the steady stream of banking transactions continues unabated...

GP Investments is buying Pride International's Latin American land drilling business for \$1 billion (Goldman is advising on the deal)...

Goldman Sachs Urban Investment Group is buying out Nursefinders from Gryphon Investors (my sources tell me the deal was for \$250 million)...

And Quintana Capital is taking over Directional Drilling for a reported \$40 million bucks... *That's just a portion of today's deals!*

Even if the number of weekly deal announcements were to suddenly drop by 95%, we'd still be looking at 34 brand-new opportunities every week!

Opportunities like this one...

SECRET MONEY TRANSFER #5
 Skimming \$21,100 from the Alltel Deal

The Target: Alltel
Deal Value: \$26 billion
Potential Gain (Options): 422%

Alltel was registering high on 24 *Transaction Triggers*. So I used my computer "Pass Code" technique to confirm the coming move. Indeed, my reading indicated an imminent takeover of Alltel.

So I alerted my readers right away.

Had you joined us, you could have bought Alltel Friday afternoon... and watched your gains explode *in the first 30 minutes of trading Monday morning (see chart above)*. You could have pocketed \$21,100 for every \$5,000 invested in the options.

But here's where it gets really interesting...

The computer-generated report that revealed the coming Alltel transaction also turned up NINE additional opportunities. My former investment bank's computers generated the report. I have obtained it legally using my "Pass Code" technique.

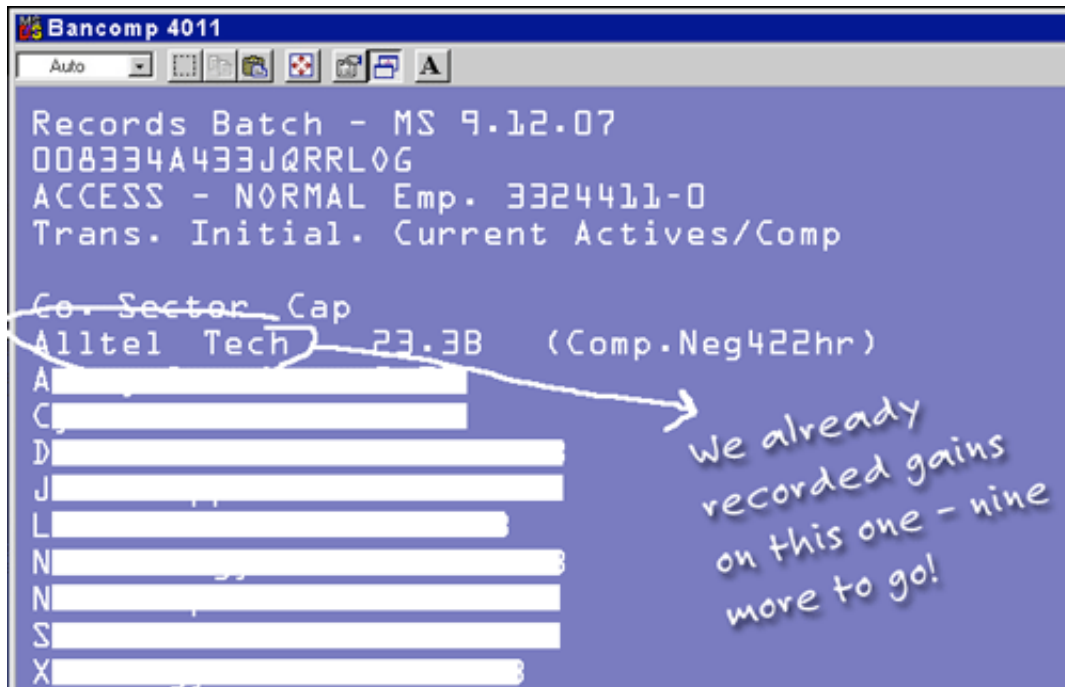

But what it comes down to is this: Right now, we are looking at NINE more blockbuster transactions. Each of them has the potential to hand you \$5,250 or more in pure "skim."

One of them is a deal worth \$26 billion. If they execute this transaction when indicated, it would be one of the biggest takeovers in the history of the defense industry.

16

A sneak-peek inside Wall Street's banking computers... at our next 9 opportunities

Take a look at what I'm seeing on my computer screen. This is the actual report generated by our *Takeover Trader* system:

This "screen shot" may look like nonsense to the average person. But it's really showing nine

upcoming opportunities to book fast gains... You could easily pocket a few thousand from each deal when it goes through.

Even better: remember that my old bank advises on more than 350 of these deals every year. We can tap into all of them, along with thousands more. So these nine "locked and loaded" opportunities - while important - are just the tip of the iceberg!

But there's another reason to move quickly...

Why I must limit the size of my "inner circle"

These opportunities are based on rare and timely intelligence. Keeping this intelligence secure is the ONLY way we can keep racking up these gains so consistently. Because if word were to spread about the upcoming transactions, we could easily get lost in the crush of speculators.

17 So I hope you understand why I can only allow a handful of new investors into my "inner circle."

Right now, we have a HUGE advantage over the Wall Street fat cats. We can "peek inside" their computers and see their upcoming moves without ever being detected ourselves. And we can act quietly on that information time and again.

In order to preserve that advantage, I will be capping participation. First come, first served.

But how much will it cost?

I REALLY don't want you to miss out, so...

Of course I cannot offer this powerful service for free. But I have decided on what I think is a very low price. After all, I left my cushy job on the Street specifically to bring this system to regular investors. So charging an arm and a leg would make no sense.

That means you can get my **Takeover Trader** recommendations for an entire year for just \$2,900. Frankly, major firms pay 10 times that amount for intelligence this powerful. And our next recommendation could pay for your subscription many times over.

However...

I would hate to have you hesitate and wind up missing out on the nine "fish in a barrel" opportunities the system just uncovered.

So I've been talking it over with my publishers here at *The Oxford Club* (America's largest private investors' club, where I serve as Associate Investment Director). And we've come up with an offer that I believe no sensible investor could refuse...

18

Respond Today and get HALF OFF!

Sign up for the Takeover Trader today and receive a whole year of the service for just \$1,477. That's 49% off the normal price! You'll save \$1,423 right off the bat. And it'll ensure you don't

miss out on our nine upcoming opportunities... or the dozens more to come...

Keep in mind that I'm only extending this limited-time offer because of the special situation involved. Once the deadline passes, this offer will expire. Period. However, you risk virtually nothing by signing up today. Because I'm also offering you this special guarantee...

19

Or you can just try it RISK-FREE for 30 days...

Claim your spot now and **I'll send you 30 days of the service FREE**. Try it out. Paper-trade the recommendations. If you're not completely satisfied, let me know right up to midnight on the 30th day and I'll send you a prompt and full refund.

But if you like the **Takeover Trader** - and I'm confident you will - then I'll wait until the end of your trial period before "officially" beginning your 1-year subscription. That means you'll get 30 days of the service absolutely free - PLUS an additional year of recommendations!

If you're still reading, I assume you're with me so far? That's great.

But I have one more surprise for you.

Either way, the "Pass Code" is YOURS to keep!

I've never offered this before and I never will again... Sign up now and by midday tomorrow, I'll rush you a confidential dossier I've just prepared.

This document reveals my "Pass Code" technique in detail. Once you've read it, you'll possess the "Code." More important, you'll be able to "peek into" Wall Street's banking system any time you like using your home computer!

(Do I even have to remind you how profitable that can be?)

The dossier is called: **Accessing the World's Biggest Banking Transactions with My Electronic "Pass Code: GY2389"**

You can read it in 10 minutes. And it'll be yours to keep, even if you cancel. That's my way of saying "thank you" for trying my research.

20

In addition, of course, you'll also receive the **Takeover Trader** service itself. Including our next nine special opportunities, you'll receive 30-50 new recommendations sent straight to your "inbox" each year. Each with the potential to hand you \$5,250... or more.

Finally, you'll receive special access to our password-protected website. There you'll find the companies we're recommending right now, along with new ones as we add them to the portfolio. If you move today, you could book gains on every one of these transactions, too!

To lock in your \$1,423 savings right now... and your 30 FREE days of the **Takeover Trader** service... and your reserved copy of *Accessing the World's Biggest Banking Transactions with My Electronic "Pass Code"*. **GU2389**

Or if you'd prefer, you can order direct from my personal assistant by dialing 1.888.570.9830

or 1.410.454.0498 and mentioning Priority Code: .

Then get ready for the most profitable 12 months you've ever had in the markets... bar none.

Sincerely,

A handwritten signature in black ink that reads "Louis Basenese". The signature is written in a cursive, slightly slanted style.

Louis Basenese
Founder and Editor
The Takeover Trader
March 2008

P.S. While I don't make guarantees as to how much money you'll make (it just seems kind of silly), I absolutely guarantee that you will love this service. **That's why I'm tacking on the 30 DAYS FREE, right out of the gate.** Try the service. Paper-trade the recommendations. And if you're not thrilled with it, let us know up to midnight on the 30th day and receive a prompt, courteous refund. If you like what you see, I'll wait until after the free month is over, and THEN start your 12-month subscription!

P.P.S. Remember, my readers had an opportunity to book 422% on the Alltel deal - the first of 10 companies on our "pending list" generated by the computers at the Wall Street bank where I worked.

Monthly Copywriting Genius #61

Copywriting Comments

1. Secret of Inflammation Your Reader's Most Pressing Worry: Find your reader's point of maximum anxiety; arouse their curiosity. In this headline, the writer is arousing the reader's curiosity with the "secret banking pass code."
2. Secret of Reason for Urgency: Give the reader a reason to act now.
3. Secret of Reason for Urgency: Give the reader a reason to act now. Right here in the lead, the writer is creating a sense of urgency... There is no time to waste.
4. Secret of the Big Story: Let your reader in behind the scenes, or make them feel they are seeing events unfold before their very eyes.
5. Secret of Audacity: Make an audacious claim or promise but don't explain it right away.
6. Secret of the Big Story: Let your reader in behind the scenes, or make them feel they are seeing events unfold before their very eyes.
7. Secret of Show, Then Tell: Show the reader using analogy, stories, examples... Then tell him about the product.
8. Secret of Fascination Teasers: A way to create extraordinary curiosity in your reader by offering a tip, insight, question or statement that forces the reader to read on for further explanation.
9. Secret of Credibility: Use factual statements, media quotes, names of well-known people or institutions, testimonials. These are portions of copy that remove doubt or natural skepticism.
10. Secret of Show, then Tell: Show the reader using analogy, stories, examples... Then tell him about the product.
11. Secret of Exclusivity: A way to position the product or service where only a select group is allowed to participate or receive it. This fits the prospect's desire to be part of something unique.
12. Secret of the Silent Usher: The sub-head is a way to bring people back into the copy.
13. Secret of the Golden Thread: Constantly stimulate reader's needs and desires throughout the package.

14. Secret of Fascination Teasers: A way to create extraordinary curiosity in your reader by offering a tip, insight, question or statement that forces the reader to read on for further explanation.
15. Secret of the Silent Usher: The sub-head is a way to bring people back into the copy.
16. Secret of More Than One Reason to Act: Give the reader more than one reason to act now. Aim for at least 3.
17. Secret of Exclusivity: A way to position the product or service where only a select group is allowed to participate or receive it. This fits the prospect's desire to be part of something unique
18. Secret of Value Proposition: Make an almost unbelievable offer – one that the reader absolutely cannot say “no” to. The deal is so good, it rings of value, either because the price of the product is deeply discounted, the premiums given are in-depth and valuable, or the guarantee removes any risk.
19. Secret of Call to Action: A paragraph or sentence written in a way that makes the reader feel compelled to take action right now. It “pushes” the reader to pick up the phone, fill out the reply form or make a donation.
20. Secret of Answering Every Objection: Overcome every objection the reader may have for not buying the product.
